

I will...

Think of myself as a researcher

Consider myself a researcher for the first time, as reflective practice is part of all of my work

Unpack the barriers I put on myself.

Think differently about what research is

Think of myself as a 'researcher'!

I will believe in myself

Think about creative ways to disseminate my research on children's musical play in the outdoors

Get on with that beastly funding application to explore spontaneous musical play in adventure and stories...

Think about how reflective practice = research

I will...

Be braver in facing my own personal barriers and reflect more on my use of language when working with EE's

Develop inclusive practice and look for broader dissemination opportunities

MERYC will discuss this in detail at the next board meeting. Really thought provoking seminar thanks.

Not make assumptions about others' knowledge without asking open questions

be braver

Make sure the findings are always accessible on the ground

Remember to use accessible language when sharing research

get out of my own head

Think about sharing

I will...

Make sure feedback qualitative forms from project up to date

I won't...

Take no for answer

Procrastinate

think that I have nothing to add

Panic

Allow myself to get stuck in the fear -
push forward

Be scared of research

Give up

give up on my dream

be afraid

I won't...

Be blinded by fear of academia and academics

Look for research that confirms my assumptions

Forget why I'm doing this

Think I'm not capable of research

Stop believing in myself and the families i work with

stop trying

Ignore the ordinary

Forget this discussion. This will fuel my thinking now.

Exclude

I won't...

Think that I can't do it

Always be inclusive

Accept conventional wisdom without reason

Be constrained by my own head

Claim MY voice

block myself in with panic, fear and doubt

Think these spaces aren't for me

I want to....

Learn more

Keep on learning 'cos it's amazing

Thank Nicola and everyone for the discussion

Be better at researching

Be/remain curious

Collaborate in the live!

develop research ideas that are inclusive and impactful

Call people into this amazing community

take the energy and support of this group forward in my work

I want to....

read more research (any suggestions?)

Pass on my passion and feel more empowered to do so

Always be as inclusive as possible

Find out what kind of research everyone here wants to undertake. I'm nosey!

Embed action research into all of my Youth Music projects and try to influence their evaluation process for the better

Claim my voice

be more engaged with what is going on in both research and practice

Get some great qualitative data for project journal

Explore creative dissemination

I want to....

harness the potential of this force for good
and for musical saturation

Find exciting creative ways to help families
access research ... And ultimately reach
more children

Build on this with discussion of how can
encourage more people to take an interest
in the work of MERYC

Do twice as much as I have done.

Be brave and pursue my questions deeply

Find out what Early Years Research is going
on it there
